

RESILIENCE AND CITIZEN ACTION

PRESENTED BY ASSOCIATION
OF ARCHITECTURE ORGANIZATIONS

Thursday, November 3 at 6:30pm

Miami Dade College, Wolfson Campus Auditorium
Free Panel Discussion, RSVP Requested

On the heels of Miami being named a new member of the 100 Resilient Cities network, Next City publisher and CEO Tom Dallessio hosts a round table discussion with several leaders (national and local) working to advance public action on climate change.

Going beyond flood mitigation strategies and other tactical responses, our expert panel considers the broader thinking and opportunities for addressing the social and economic challenges that will come to define the “resilient” city in the coming years.
